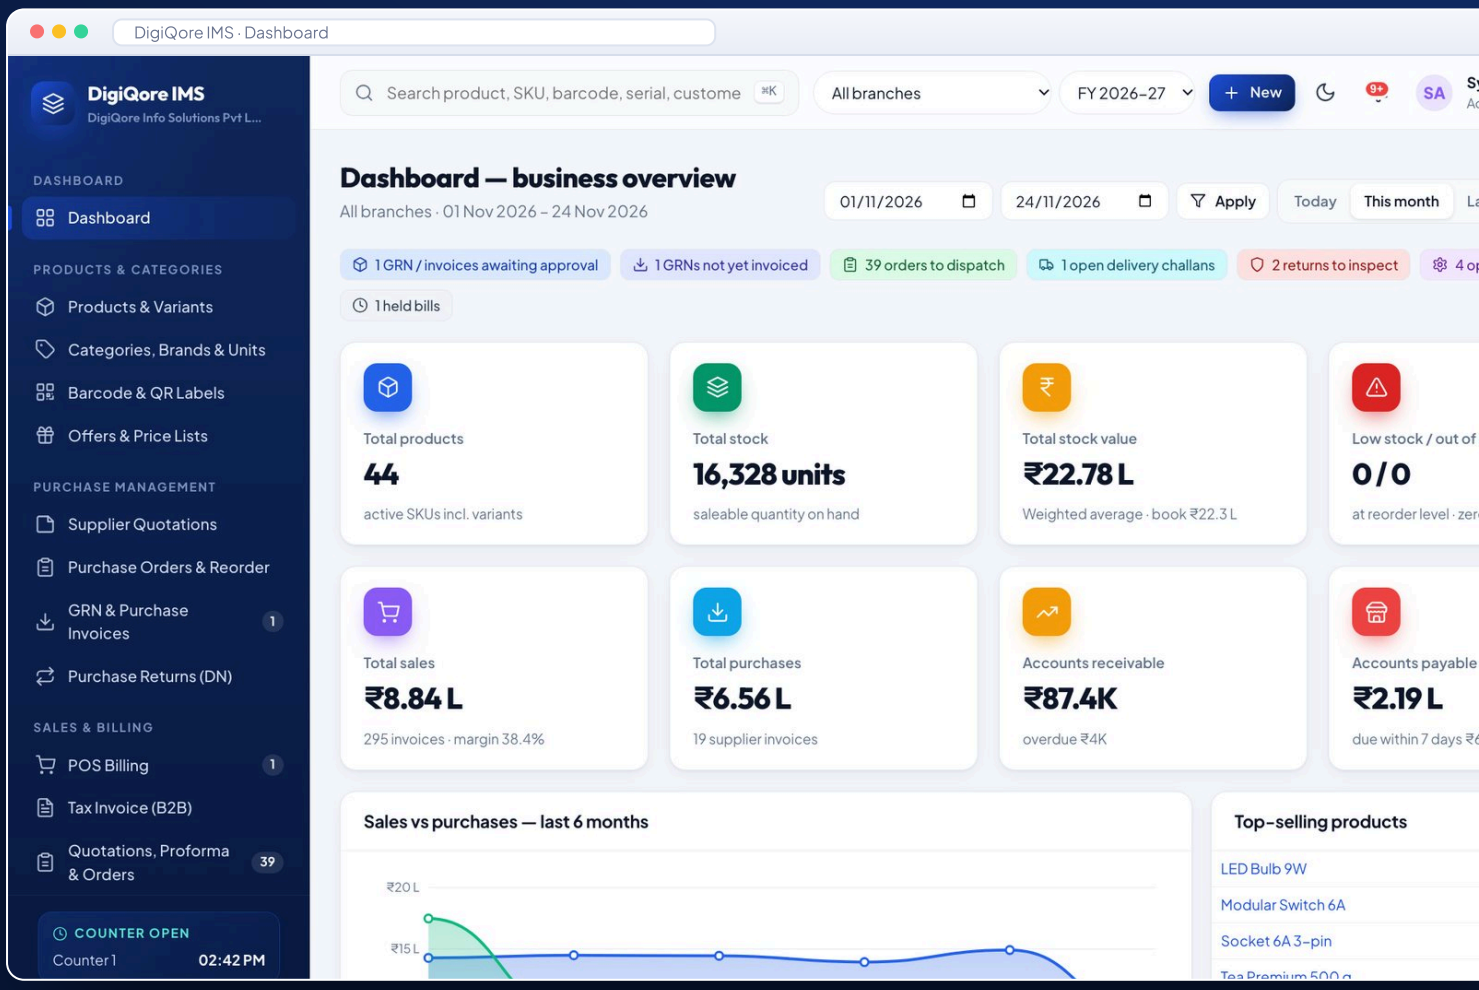
DigiQore IMS
INNOVATE · AUTOMATE · GROW

Inventory, billing & accounts — one smart portal for growing businesses.

DigiQore IMS is a complete inventory management software for small and medium enterprises: products, purchasing, POS and B2B billing, multi-warehouse stock, GST accounts, reports and automation — working together in real time.

- ✓ GST ready (GSTR-1 / 3B)
- ✓ POS + wholesale billing
- ✓ Multi-branch & warehouses
- ✓ Batch, expiry & serial no.
- ✓ Works on desktop, tablet & mobile



DIGIQORE INFO SOLUTIONS PRIVATE LIMITED

Wholesale & distribution
Price levels, credit, godowns

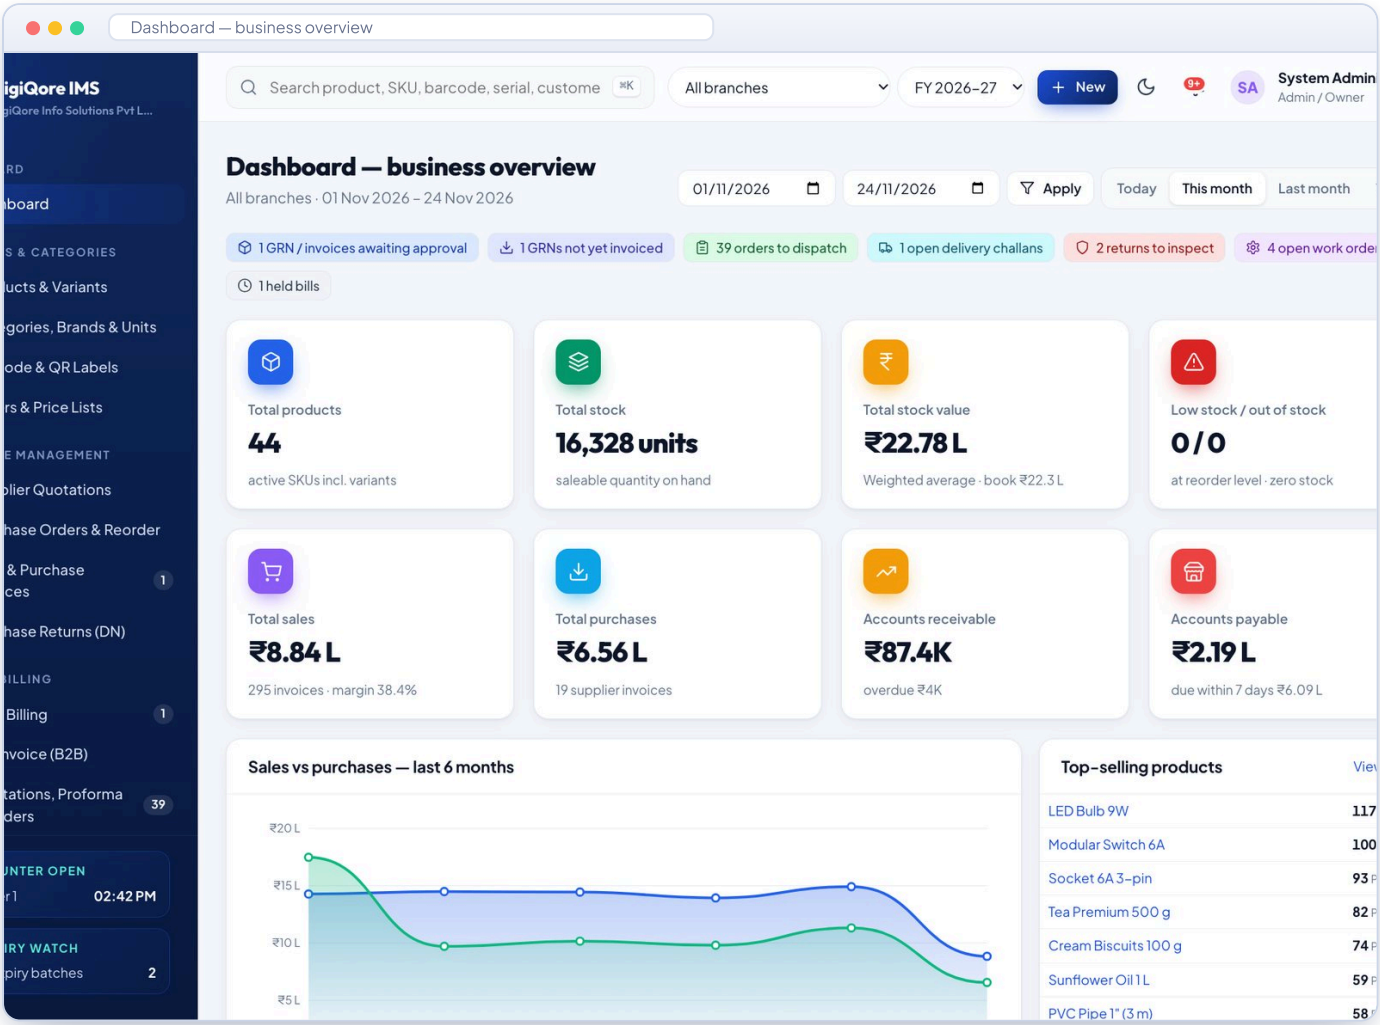
Electronics & hardware
Variants, serials, warranty

Manufacturing
BOM, work orders, wastage

Multi-branch chains
Branches, transfers, control

Know your business at a glance

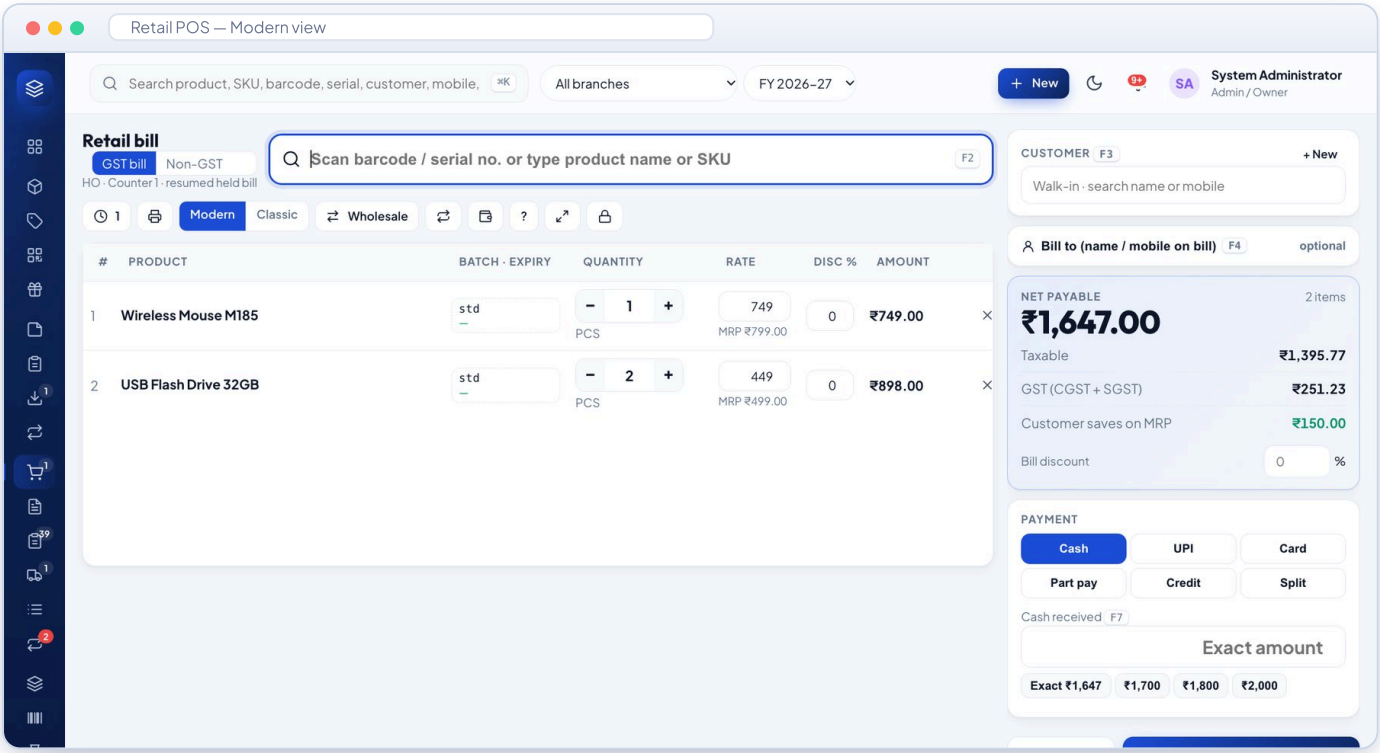
The moment you sign in, DigiQore IMS shows what needs your attention today — and how the business is trending.



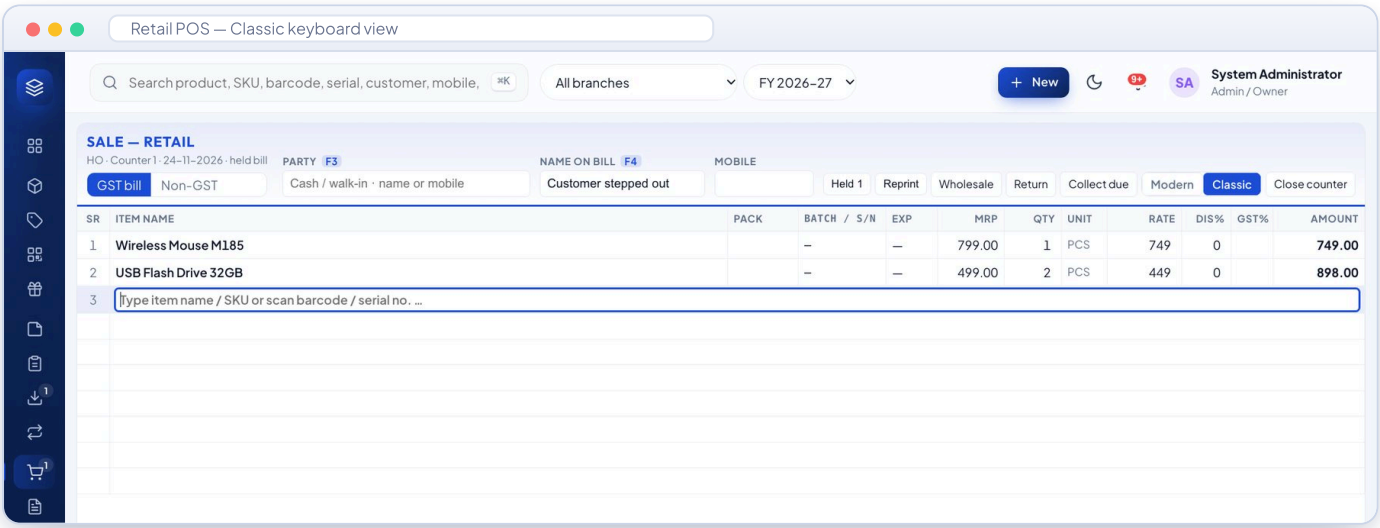
- **Real-time KPIs**
  Products, stock quantity and value, low and out-of-stock items
- **Money in, money out**
  Sales, purchases, receivables and payables with overdue amounts
- **Action chips**
  GRNs awaiting approval, orders to dispatch, returns to inspect, held bills
- **Trends**
  6-month sales vs purchase chart, top-selling products, stock movement
- **Any period, any branch**
  Today, this month, last month, financial year — one branch or all
- **Stock by warehouse**
  See where your money is sitting, valued by your chosen method

Fast billing at the counter — your way

Two billing views on the same engine. Staff choose the one they are fastest with; every bill follows the same pricing, stock and GST rules.



Modern view — scan a barcode or serial number, pick from search, tap quantity, choose payment. Ideal for touch screens.



Classic view — dense, keyboard-only grid (pharmacy / Marg style): Enter flows item → batch → quantity → next item, with F-key shortcuts for everything.

- **Barcode & serial scanning**
  Earliest-expiry batch picked automatically
- **Cash, UPI, card, split, credit**
  Change calculator and note suggestions
- **Hold & resume bills**
  Unsaved bills are recovered after a crash
- **Counter sessions**
  Open / close the cash drawer with a denomination count

GST or Non-GST, paid or part-paid

Real shops need flexibility. DigiQore IMS handles every way your customers buy — and keeps the books right every time.

GST & Non-GST bills

- **One switch at the counter**
  Alt+N toggles the bill type
- **Own bill series**
  e.g. HO/NG/…/00001
- **Kept out of GST returns**
  Posted to a separate sales ledger

Part payment & dues

- **Take an advance**
  The balance becomes the customer's due
- **Walk-in to customer**
  Created from name + mobile
- **Collect later in parts**
  Bill-wise receipt every time

Wholesale / B2B

- **Tax invoice with GSTIN**
  IGST or CGST + SGST automatically
- **Price levels & schemes**
  Wholesale, dealer, customer-specific
- **Credit limits & approvals**
  Manager approval when exceeded

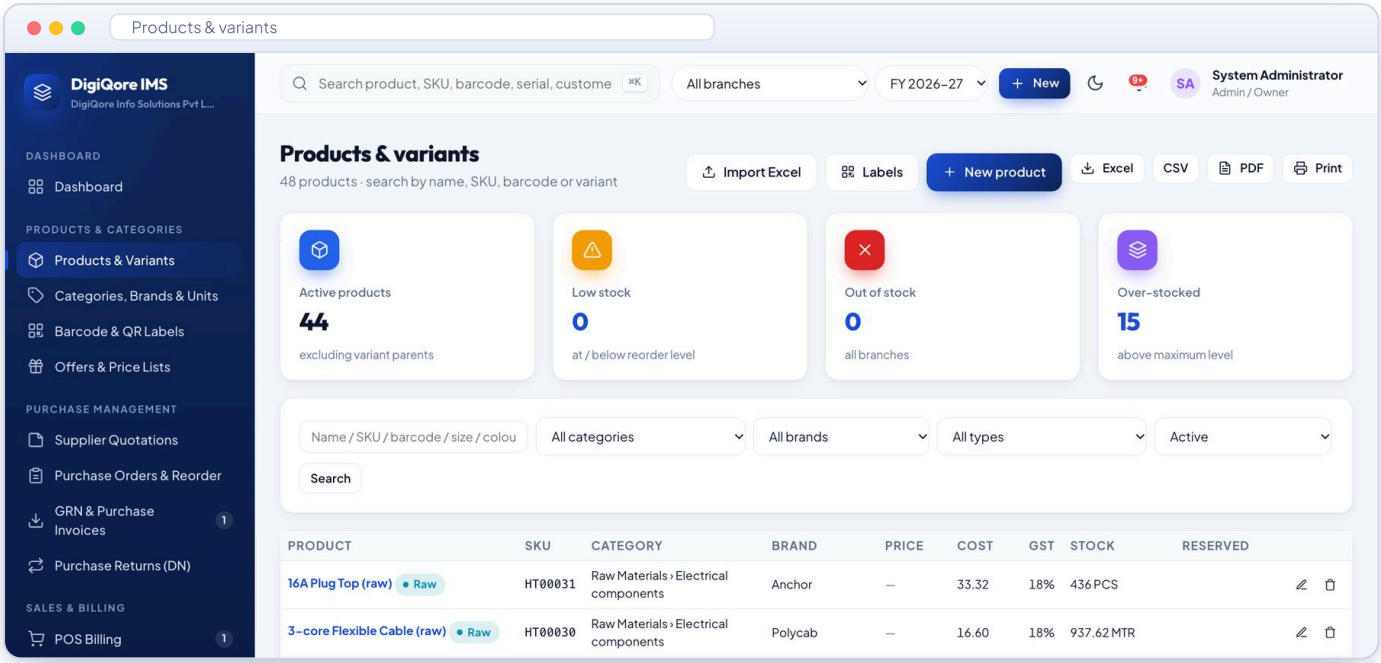
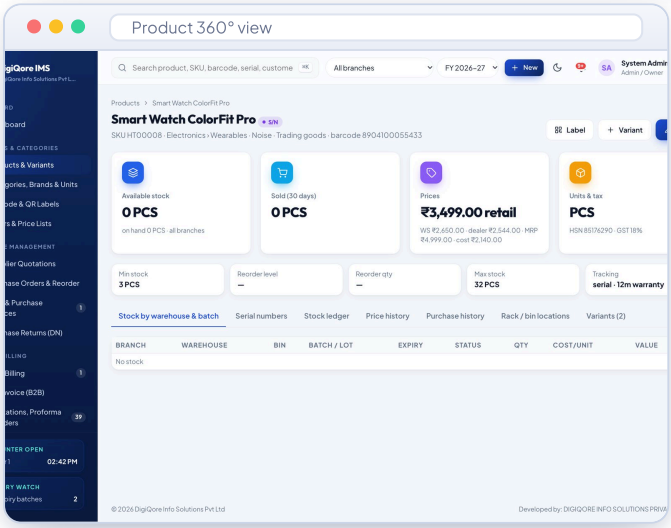
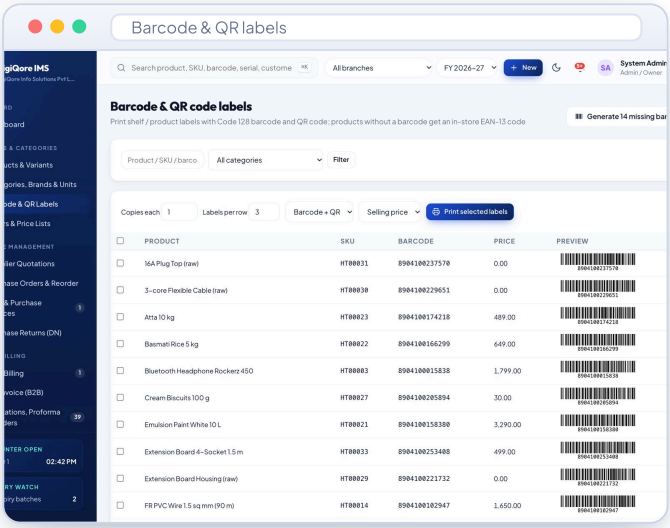
A product master that fits any trade

From loose groceries to serial-numbered electronics, set each product up the way it is actually bought, stocked and sold.





Product 360° — stock by warehouse & batch, serials, ledger, price history, variants.

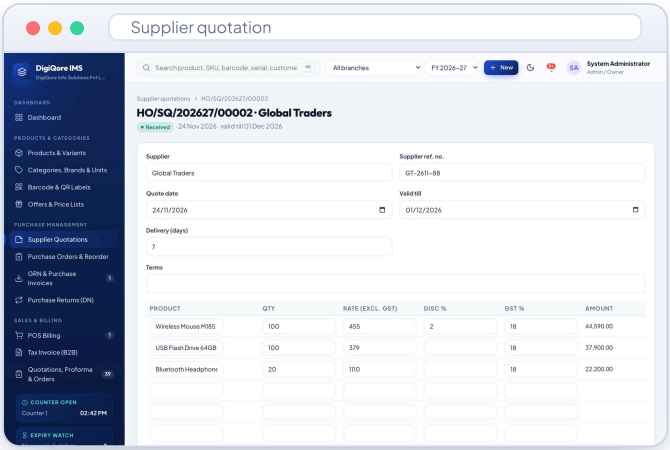


Barcode & QR labels — Code 128 + QR, generate missing EAN-13 codes, print any layout.

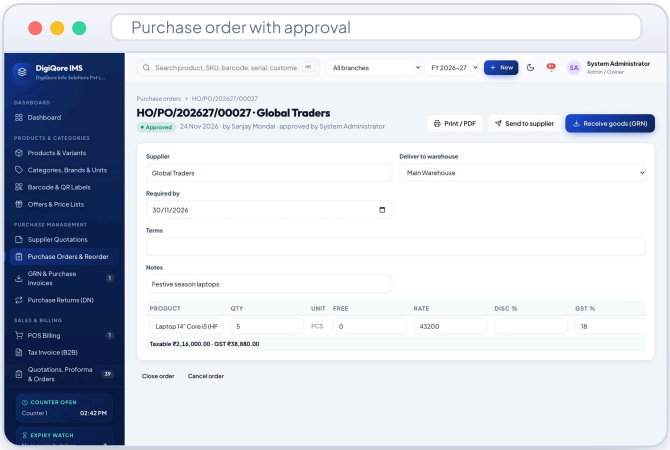
- **Variants** — Size × colour × model generated in one click
- **Units & conversion** — Box of 12, coil sold by metre, purchase units
- **5 price levels** — Purchase, retail, wholesale, dealer, MRP
- **Stock levels** — Minimum, reorder and maximum per product
- **Batch, expiry & serial tracking** — Switch on only where needed
- **Categories & brands** — Sub-categories, HSN and GST rates

Buy smarter, pay right

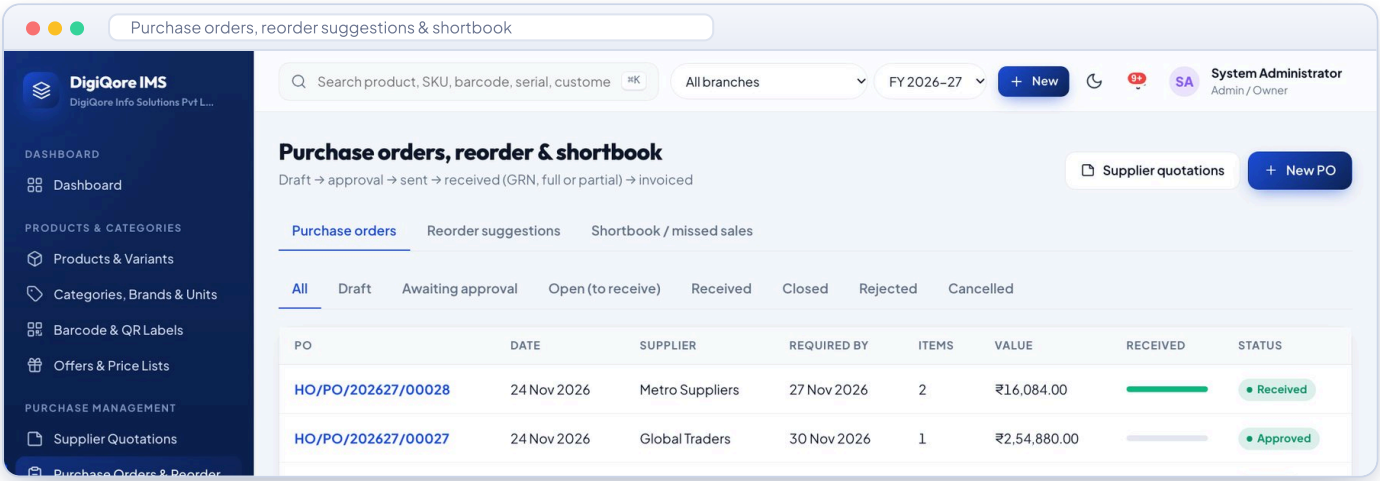
A controlled purchase cycle — compare suppliers, approve orders, receive goods, then book the bill. Every step is linked and traceable.

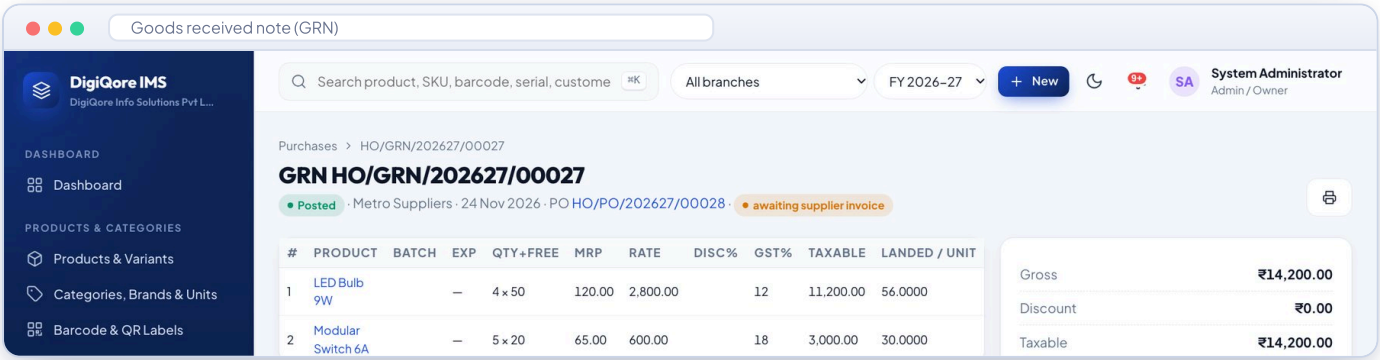


Supplier quotations — compare prices side by side and convert the winner to a PO.



Purchase orders — approval above your limit, send to supplier by email / WhatsApp.

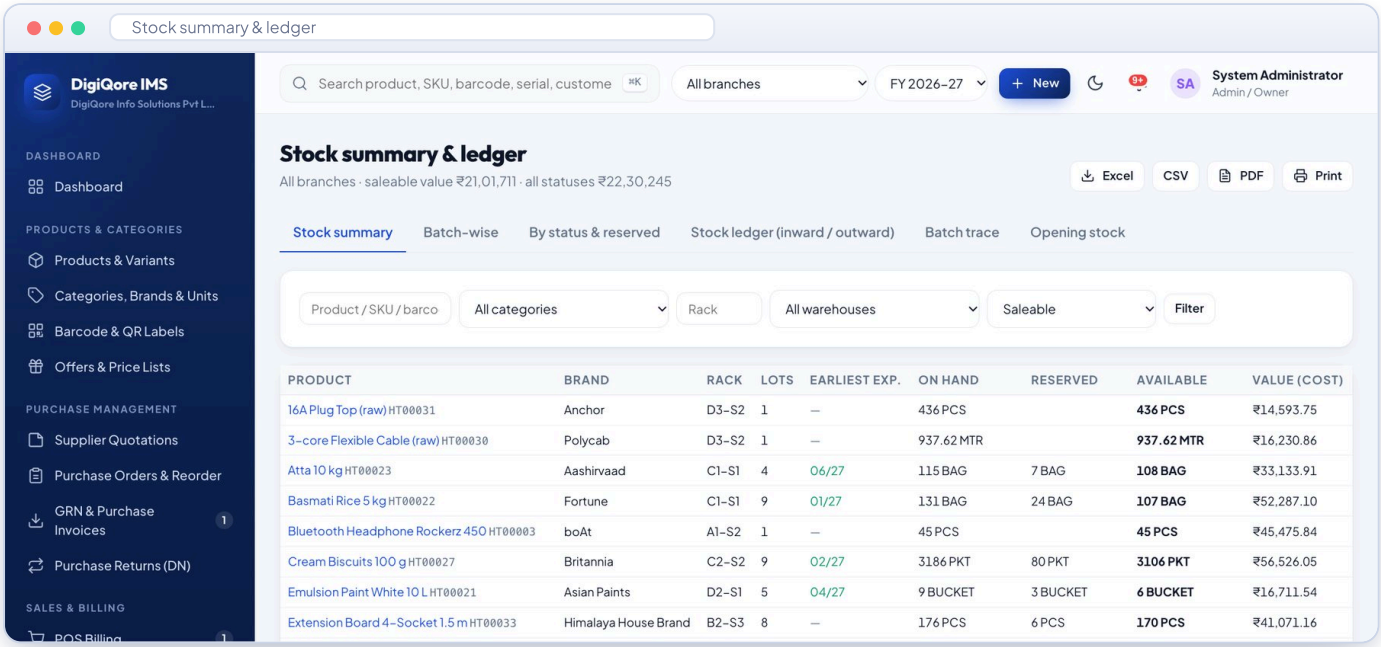


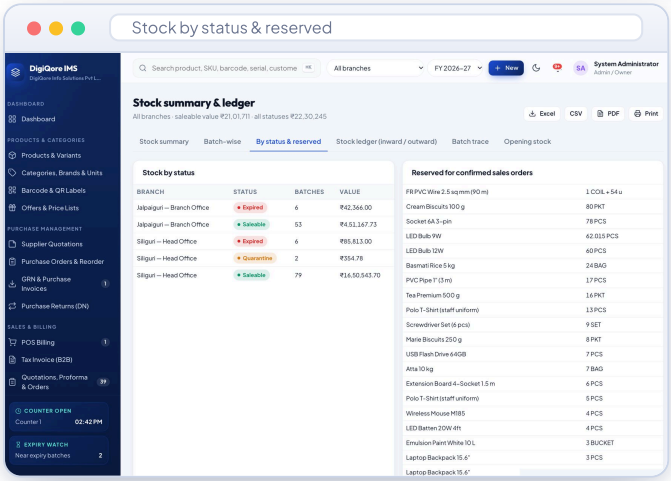


- **Full or partial GRN** — Receive goods before the invoice arrives
- **Smart reorder** — Lead time, open POs and max stock considered
- **Price variance control** — GRN vs invoice differences posted correctly
- **Purchase returns** — Debit notes and expiry claims to suppliers
- **Duplicate bill check** — Same supplier + date + amount flagged
- **Freight & charges** — Landed cost per unit calculated

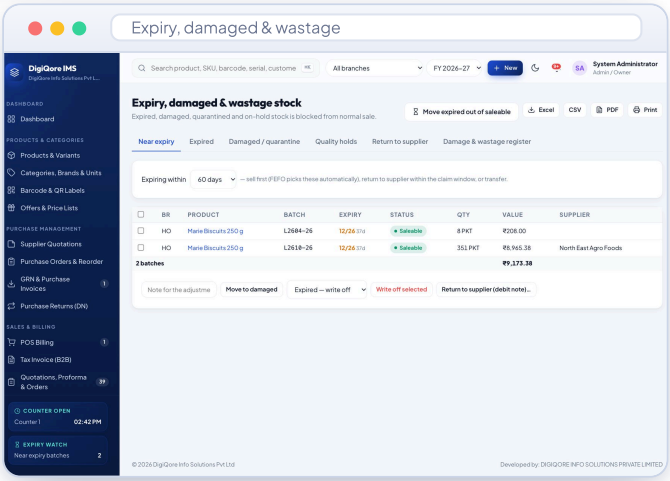
Every unit, accounted for

An immutable stock ledger records every movement — so stock in the software always matches stock in the accounts, to the rupee.





Reserved vs available — stock held for confirmed orders is never double-sold.

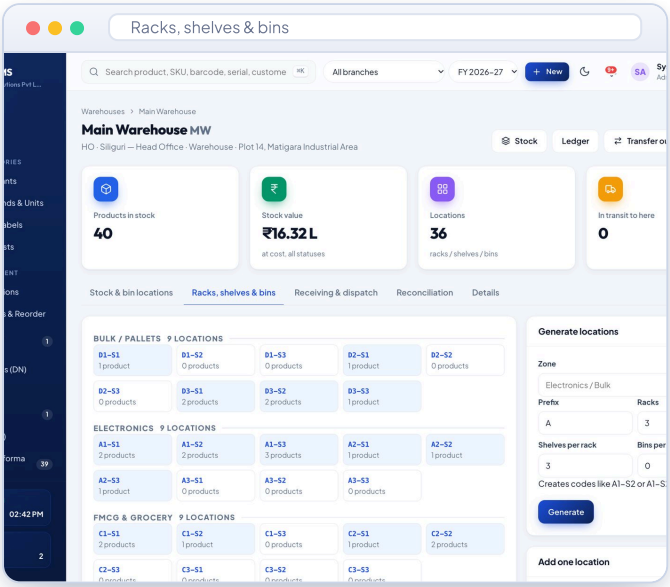


Expiry & damage — near-expiry alerts, quarantine, write-off and return to supplier.

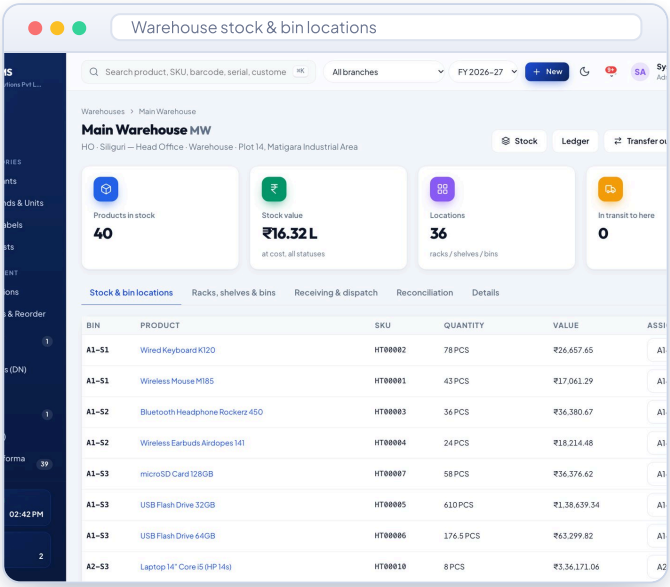
- **Real-time stock** — By product, batch, warehouse and branch
- **Adjustments** — Damage, wastage, internal use with reasons
- **Physical stock counts** — Count sheets with variance posting
- **Batch trace** — From supplier to every customer
- **Opening stock** — Import from Excel in minutes
- **Valuation** — FIFO, LIFO, weighted average

Many warehouses, one clear view

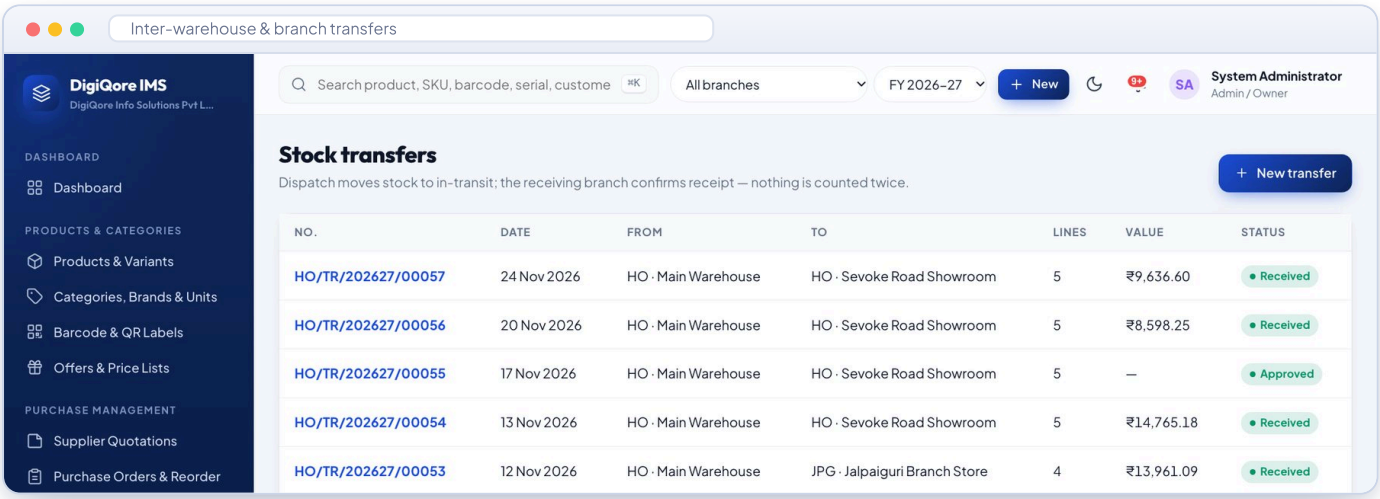
Run a main warehouse, showrooms, godowns and branch stores together — with exact locations down to the bin.

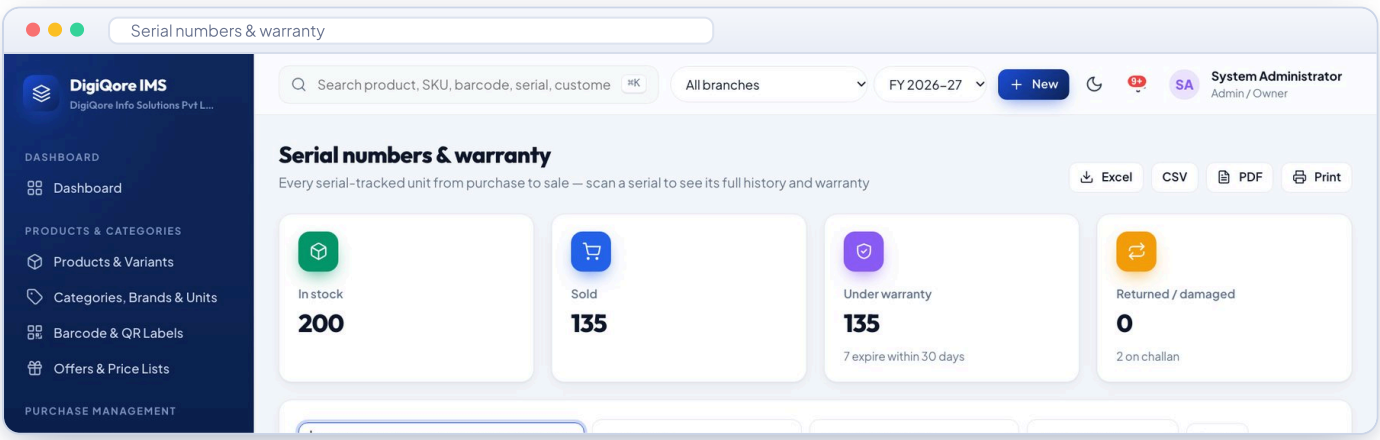


Rack / shelf / bin — generate locations in one step and assign every product.



Warehouse view — stock value, locations, receiving & dispatch log.

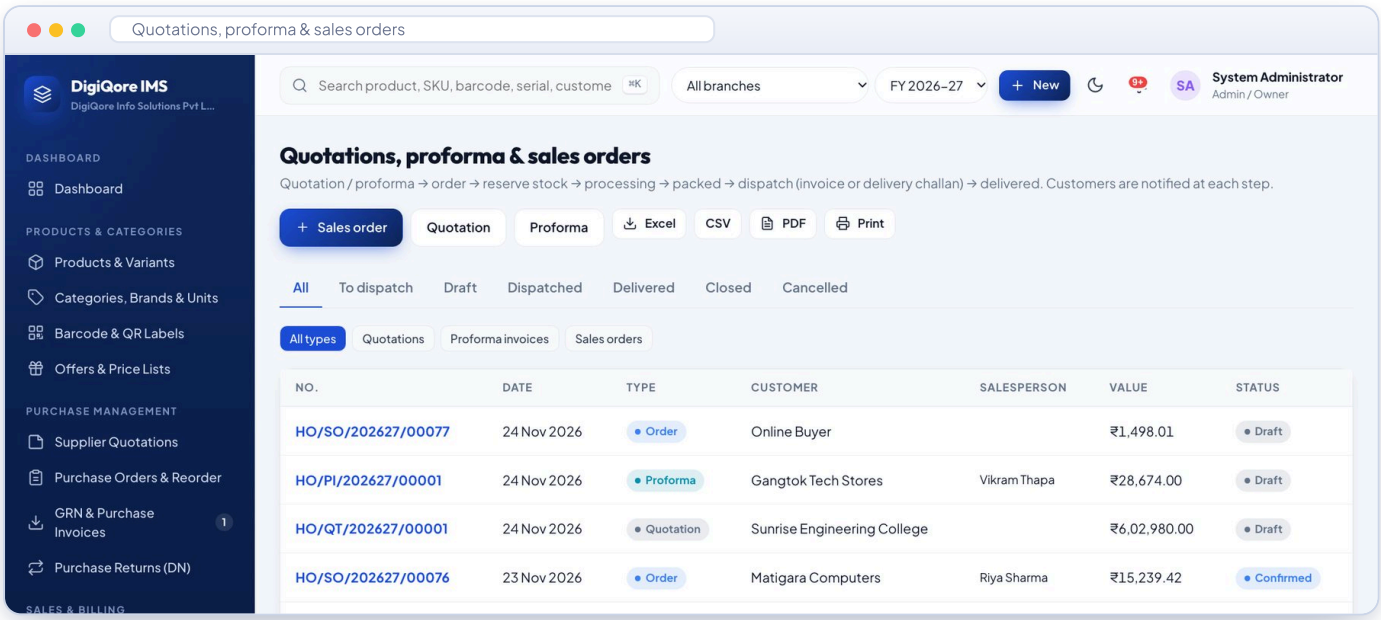


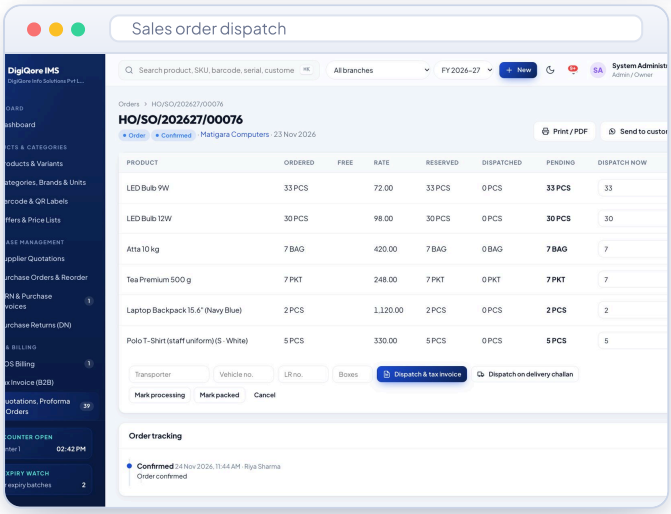


- **Transfers with in-transit**
  Receiving branch confirms the goods
- **Staff restricted by warehouse**
  Store staff see only their locations
- **Serial & warranty tracking**
  Search any serial: purchase to sale

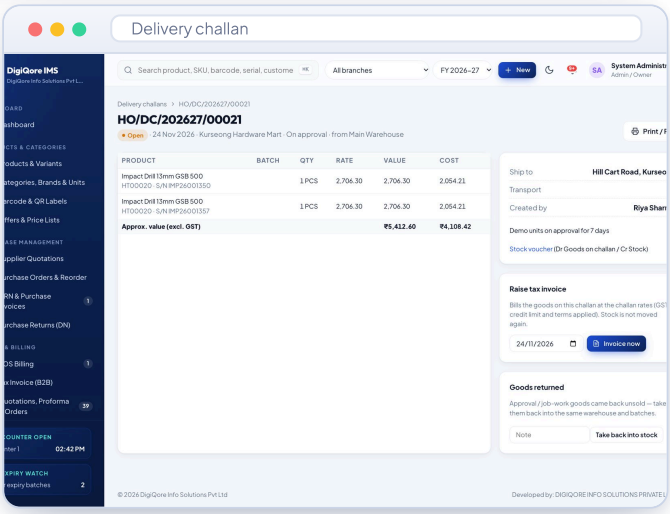
From quotation to doorstep

Quotations, proforma invoices and sales orders move through a clear status flow — and the customer is informed at every step.





Dispatch in one click — tax invoice or delivery challan, partial dispatch supported.



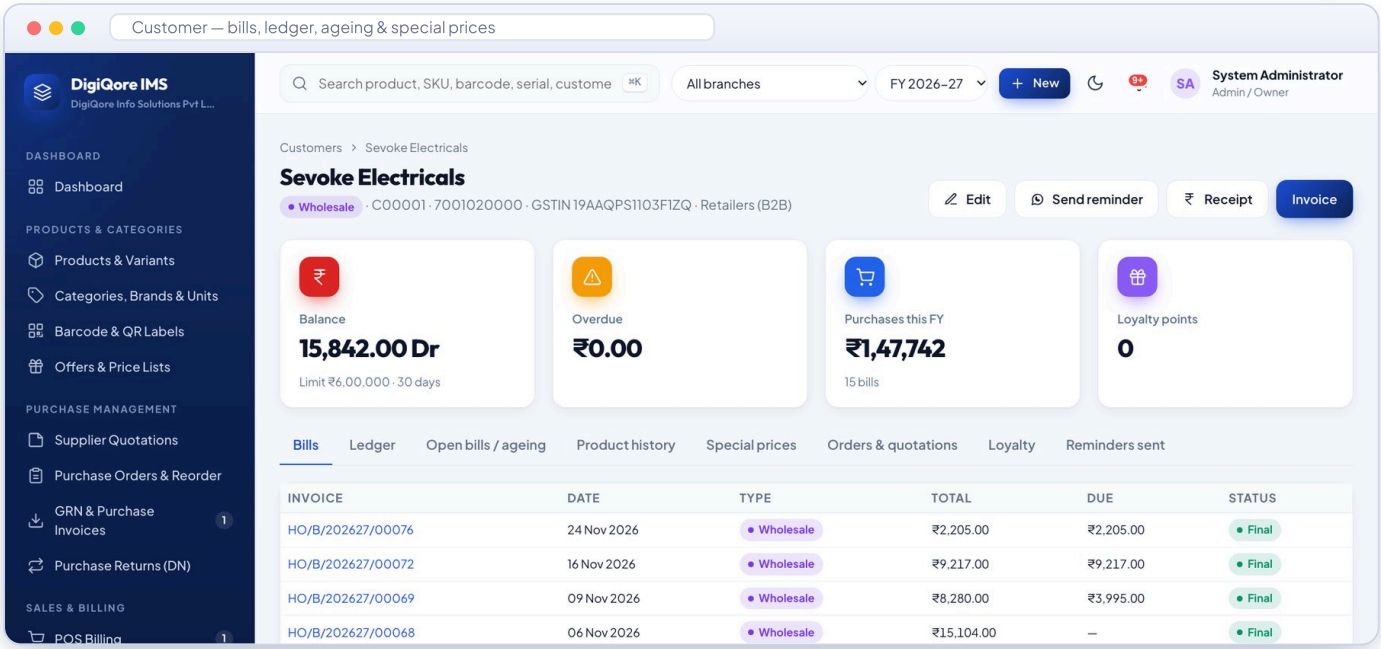
Delivery challans — for supply, approval or job work; invoice or take back later.

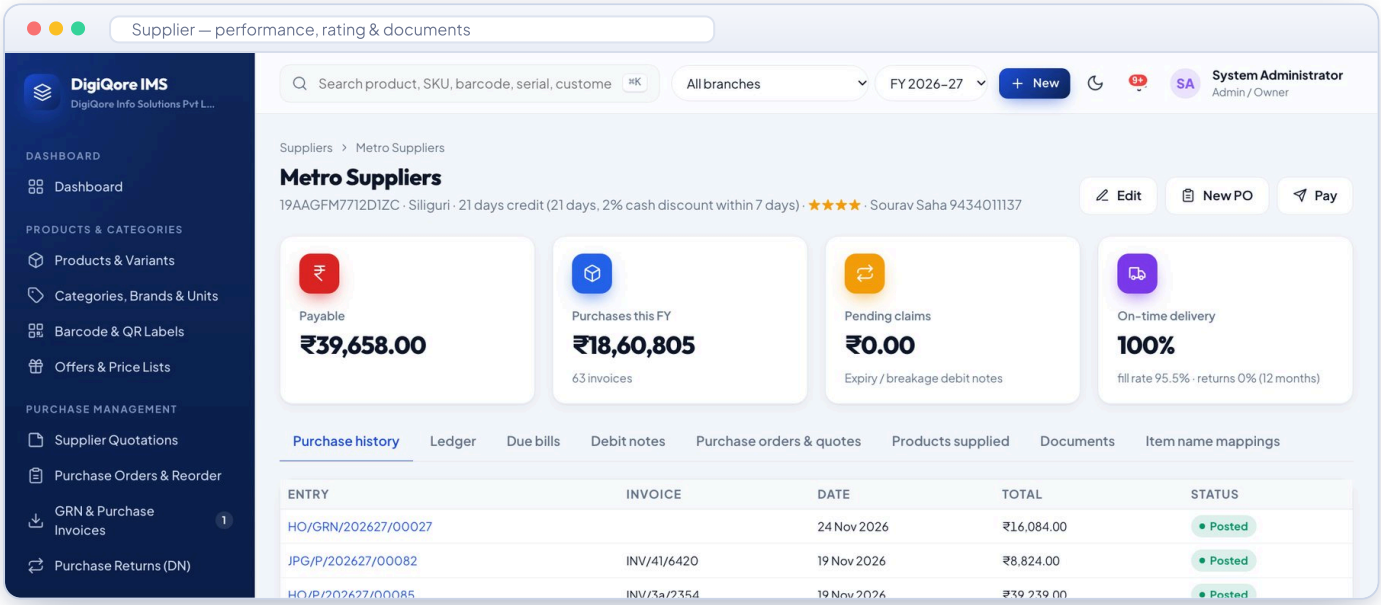
Processing → Packed → Dispatched → Delivered

Automatic WhatsApp / SMS / email to the customer at each stage · online orders arrive through the API

Strong relationships, clean ledgers

Every party has a complete history — what they bought or supplied, what they owe, and how reliable they are.

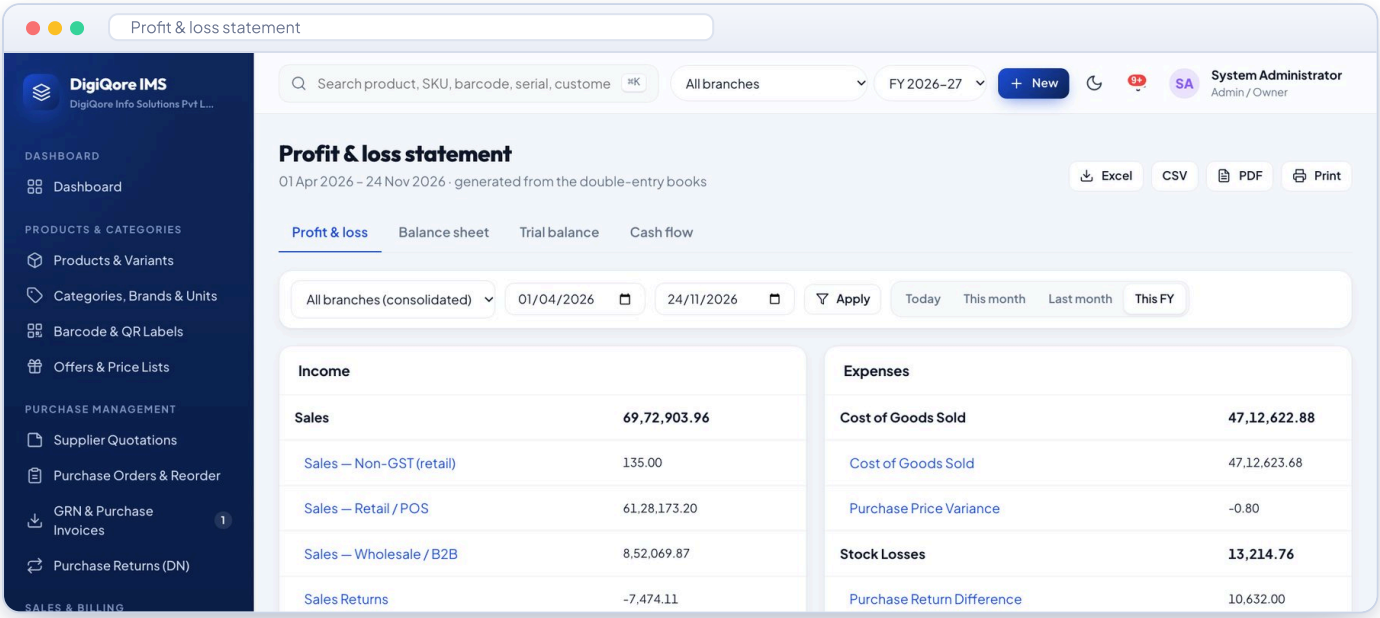


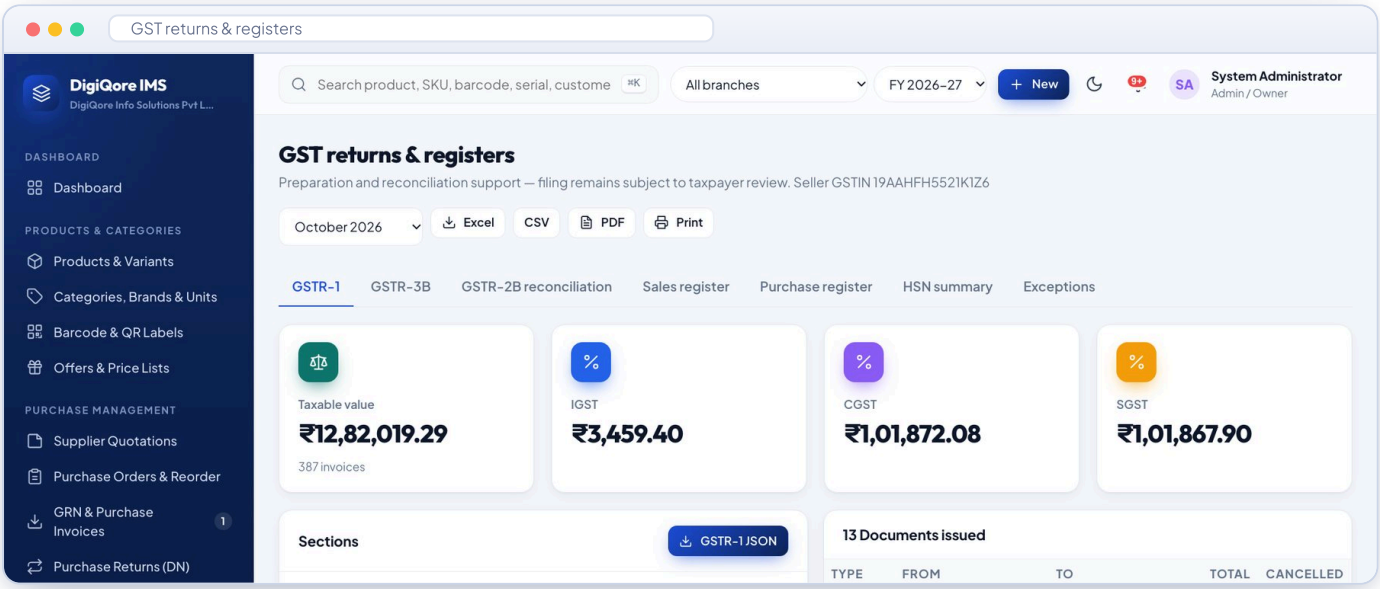


- **Customer groups & types**
  Retail, wholesale, dealer, institution
- **Credit limits & due reminders**
  WhatsApp, SMS or email — bulk or one by one
- **Customer-specific prices**
  Agreed rates applied automatically
- **Supplier performance score**
  On-time delivery, fill rate, returns
- **Documents**
  GST certificate, agreements, licences
- **Outstanding & payments**
  Bill-wise allocation, cheque tracking

Books that keep themselves

Every bill, receipt and stock movement posts a double-entry voucher automatically. Your accountant gets clean books and GST returns ready to file.

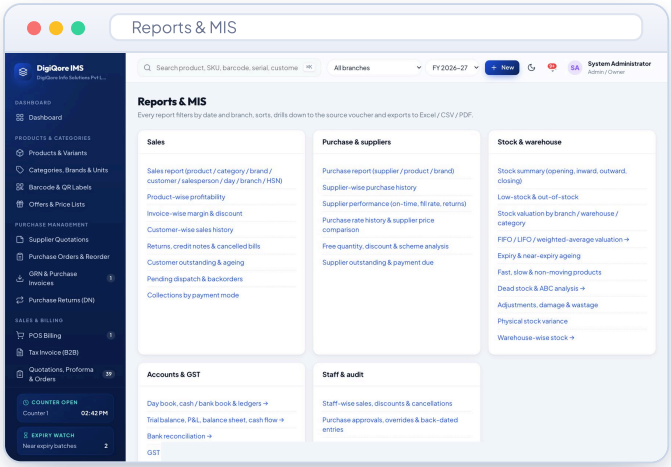


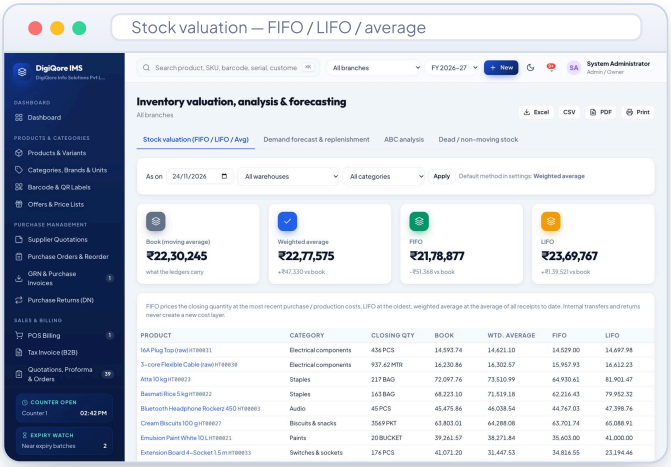


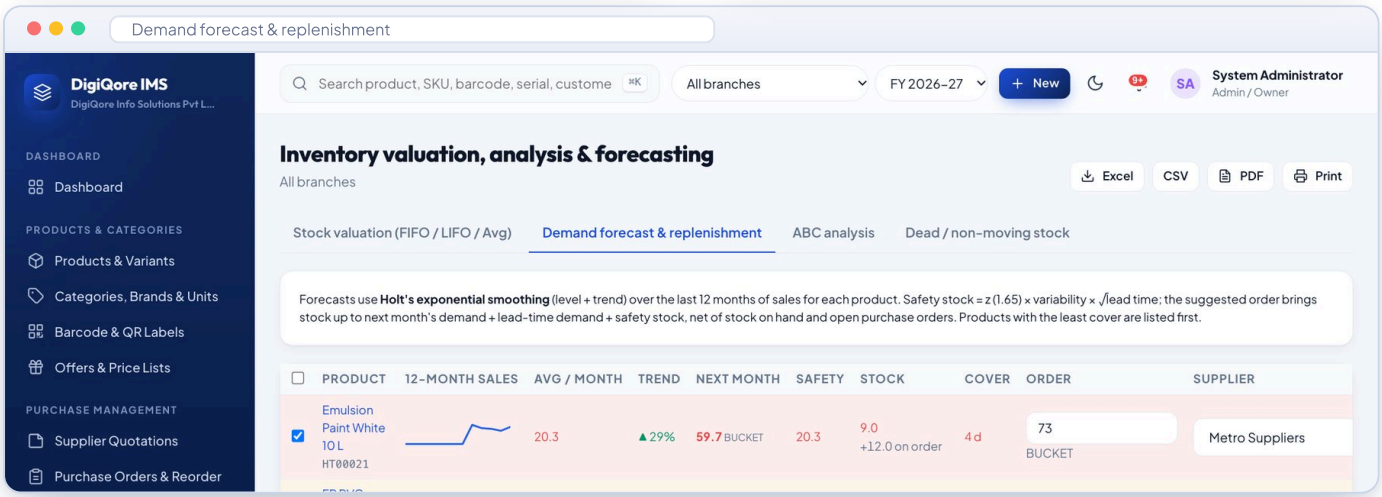
- **Cash & bank books** — Bank reconciliation (BRS)
- **P&L, balance sheet** — Trial balance and cash flow
- **Receipts & payments** — Vouchers, credit and debit notes
- **GSTR-1, GSTR-3B** — JSON ready, with HSN summary
- **GSTR-2B reconciliation** — Match supplier invoices for ITC
- **Tally export** — Masters and vouchers in Tally XML

Decisions backed by data

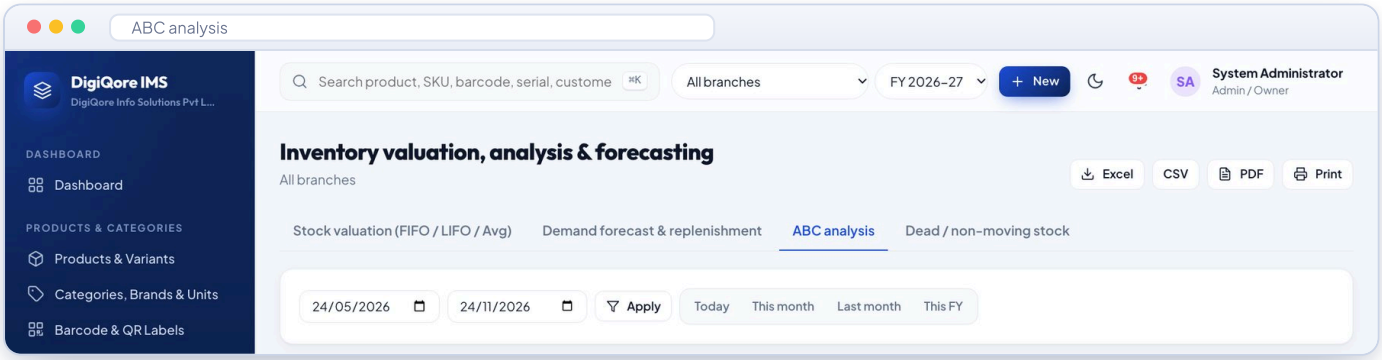
Over 25 reports, each filterable by date and branch, drilling down to the source document — exported to Excel, CSV or PDF in one click.







Demand forecasting — trend-based forecast of next month's sales with safety stock and suggested order quantity, turned into purchase orders in one click.



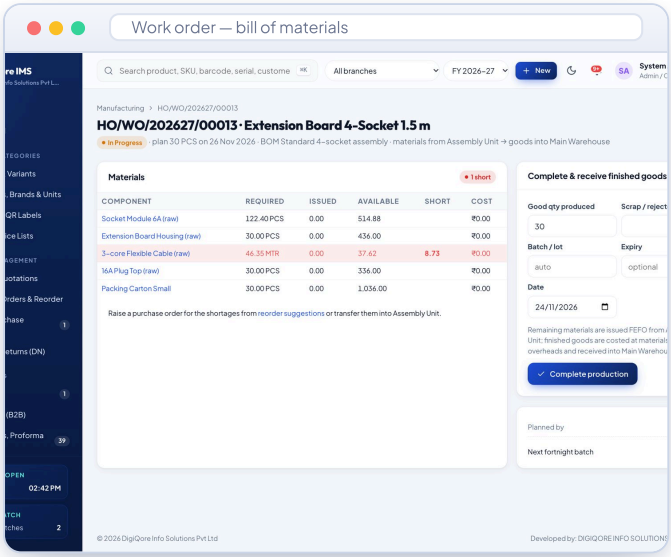
ABC & dead stock
Focus money where it matters

Profitability
By product, invoice, customer, staff

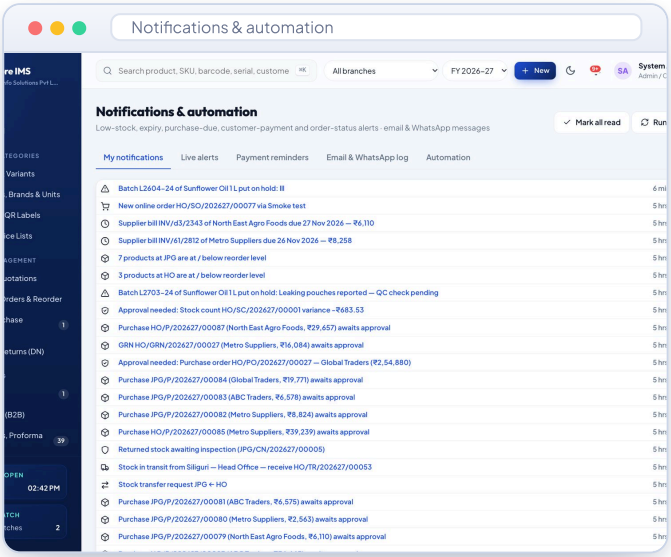
Expiry & ageing
Stock and receivable ageing

Automate, manufacture, connect

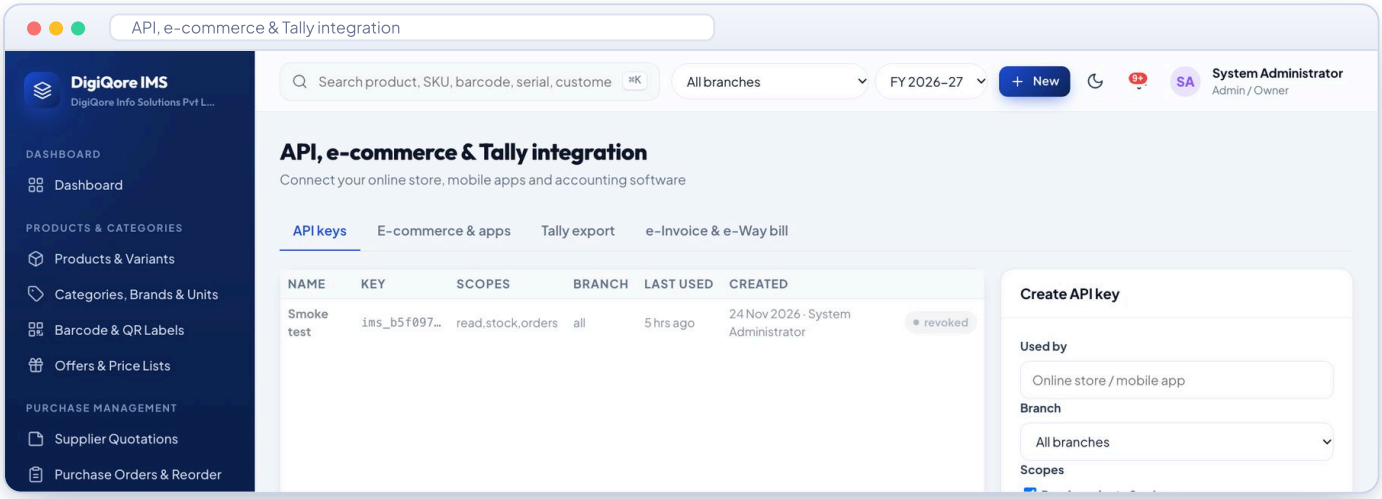
Go beyond trading: make your own products, let the system watch your business for you, and connect your online store.



Manufacturing — BOM, material issue, shortages, finished-goods batches and true production cost.



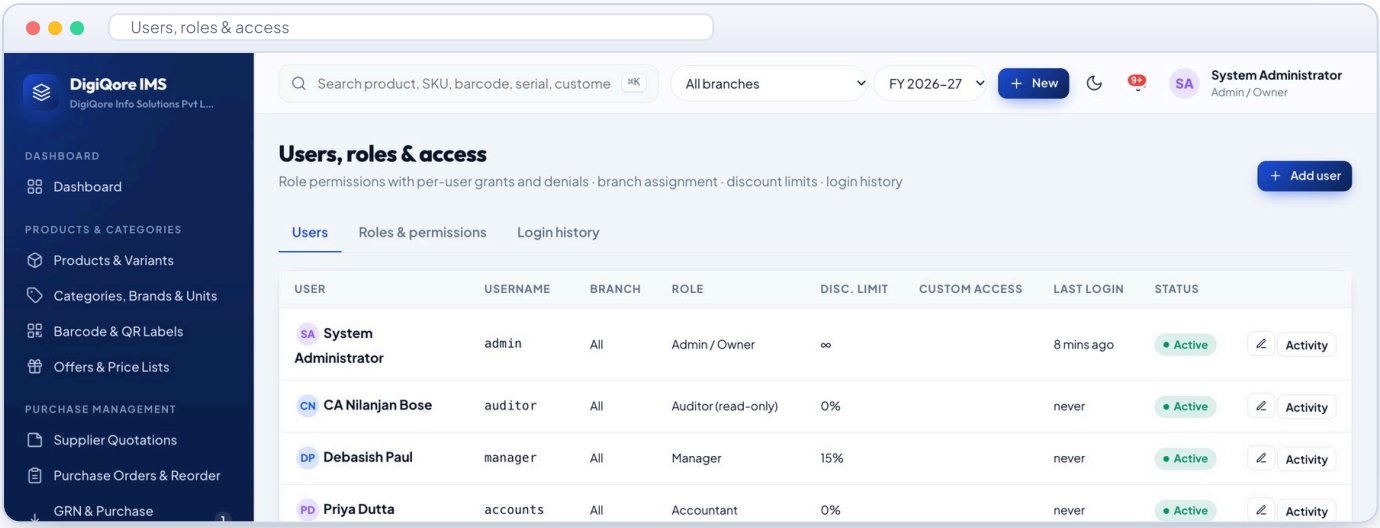
Automation — low stock, expiry, supplier dues, customer reminders and order updates, run daily.



- **REST API** — Secure keys for your website or app
- **Online orders** — Orders flow in with live stock
- **e-Invoice & e-Way bill** — JSON ready for upload
- **Excel import** — Products, parties, opening stock
- **Backup & restore** — Automatic daily backups
- **Thermal printers & scanners** — Plug-and-play at the counter

Full control, complete trust

Give every person exactly the access they need — and see everything that happens.

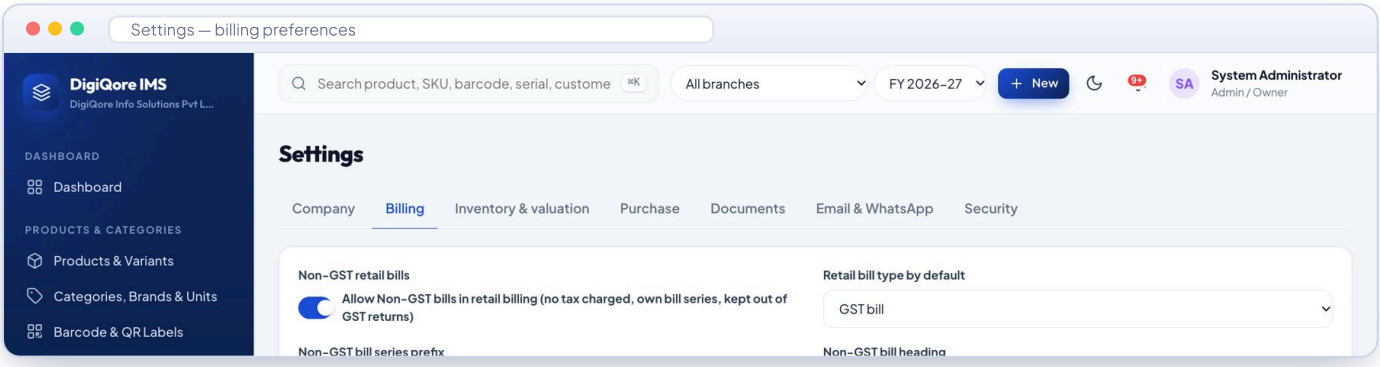


9 ready-made roles

- Admin / owner, manager, accountant
- Sales executive, POS cashier
- Purchase executive, warehouse staff
- Production supervisor, auditor (read-only)
- Per-user permission overrides & discount limits

Built-in safeguards

- **Manager approvals**
  High discounts, credit limits, back-dated bills
- **Immutable records**
  Posted documents are reversed, never deleted
- **Audit trail & login history**
  Who did what, and when
- **Two-factor login**
  Plus automatic session time-out



Web-based · multi-branch · mobile-friendly

Use it from the shop counter, the warehouse floor or your phone — on your own server or in the cloud.

DigiQore IMS
